

The BSecure LPS 1175-certified barsets provide security for building openings, such as windows, while maintaining natural light and airflow. They are suitable for use within a wide range of areas, including utilities, sub-stations, commercial properties and government buildings. The modular capabilities of the barset provides a flexible and easy-to-install design that can be adjusted according to the window's dimensions.

Independently tested and certified to LPS 1175 SR4 to provide reliable protection against experienced forced entry attempts using various tools and bodily force.

FEATURES:

- Tested and certified to LPS 1175 SR4
- Protection of building openings without compromising light or airflow
- Flexible and easy-to-install modular construction
- Face and reveal fixing options available
- Modular design
- Finish options include hot dip galvanised to meet BS EN ISO 1461 requirements, stainless steel, powder coat, or painted
