

The Sangar doorset is an outward-opening, plain-leafed steel doorset with multi-layer composite construction. Developed to resist blast, ballistic and forced entry attempts into government or commercial premises. The Sangar is tailored to safeguard and enhance the security of high-value military and authority assets.

FEATURES:

- Blast-tested to provide reliable protection against explosives
- Internal construction made from ballistic composites
- Bullet-resistant glass (BRG) vision panel inserted to provide secure visibility
- Adaptable location – can be used on exterior or interior projects
- Customisable design
