

The Worcestershire C15 doorset is an outward-opening, plain-leafed steel doorset with multi-layer composite construction, developed to resist experienced attempts at forced entry into government and commercial premises using explosives.

The Worcestershire C15 is tailored to safeguard and enhance the security of high-value assets and high-security locations. The doorset has been tested and certified to 'People in Protected Spaces' C15 for blast resistance and provides reliable physical protection against blast threats.

FEATURES:

- Tested and certified to NPSA standards for UK Government use*
- Easy to install
- Multi-point locking for enhanced security
- Adaptable location – can be used on exterior or interior projects
- Customisable design with full installation service
