The XPM Mesh Doorset offers enhanced durability within an open, ventilated design that provides airflow and light diffusion while maintaining security to meet JSP regulations. Ideal for both interior and exterior applications, the mesh material is lightweight yet robust, making it suitable for industrial and commercial installations.

FEATURES:

- Tested and certified to JSP standards
- Easy to install
- Adaptable to any location – can be used as a second layer of security within armouries and infrastructure
- Customisable design with full installation service
