

The ISO-Secure range provides the high-security working environments such as mobile control centres, labs, or SCIF rooms. Designed to combat advanced infiltration techniques, our containers can be upgraded to resist RF and acoustic attacks, and for enhanced access control, optional secondary doorsets can be added. The composite panels, insulated lining, high-security locking systems, and accessories allow the ISO-Secure to be used in specialist controlled environments for the security and welfare of both personnel and equipment.

FEATURES:

- Tested and certified to LPS 1175: Issue 8 Security Rating up to G20 and government-approved options
- Composite lining on the walls, ceilings, and optionally the floor to maximise internal space
- Insulated lining for controlled environments requiring upgrades, including but not limited to humidity and temperature control, ideal for medical and research facilities
- Optional secondary doors for enhanced access control and an additional layer of protection in sensitive environments
- Unobtrusive, covert security upgrades retain the standard appearance of the container
- Fire-rated and non-combustible material options
- Ballistic lining options available
- RF (radio frequency) and acoustic options and upgrades available
